EXAMINER

SINGH, RACHNA

ART UNIT	PAPER NUMBER
----------	--------------

2176

DATE MAILED: 05/06/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

Application No.

09/693,321

Applicant(s)

ABDELAZIZ ET AL.

Examiner

Rachna Singh

Art Unit

2176

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 09 October 2000.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-57 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-57 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

1. This action is responsive to communications: Application filed 10/13/00 and IDS filed 8/5/01, 8/13/01, 9/10/01, and 11/18/02.
2. Claims 1-57 are pending. Claims 1, 24, 42, and 46 are independent claims.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 11, 29, and 51 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 11, 29, and 51 recite the limitation "the presentation schema advertisement". There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-7, 9, 11, 13-26, 29, 31-49, 51, and 53-57 are rejected under 35 U.S.C. 102(e) as being anticipated by Ballantyne et al., US 6,687,873 B1, 2/3/04 (filed 3/9/00).

In reference to claim 1, Ballantyne teaches a method and system of outputting data in XML format using an XML schema. Ballantyne's system discloses the following:

- Generating a model of a program application by automatically identifying one or more incidents within each program application. The incidents are used to model the report functions of the legacy computer system such as by a report data model that lists the values and types of written data fields from the legacy program applications. The list of report incidents are augmented by a formal grammar that is used to relate XML schema to the output reported by the legacy program applications. The modeling engine provides the report data model identifying the report incidents to the mapping engine and modeling GUI. The mapping engine maps the report data incidents from the report data model to the XML schema and the relationship is displayed on the modeling GUI. See column 6, lines 10-65. Compare to ***"accessing a presentation schema in the distributed computing environment, wherein the presentation schema includes information for presenting results data for clients in the distributed computing environment"***.
- Allowing a user to access "report" information such as invoices, billing statements, etc. See column 17, lines 15-67. Compare to ***"accessing results data for a client in a distributed computing environment"***.
- Outputting the XML formatted data using the XML schema generated from the legacy system. See columns 17-18. Compare to ***"presenting the results data for the client in accordance with the information from the presentation schema"***.

In reference to claim 2, Ballantyne's system comprises a service in the computing environment that generates results data (such as invoices, billing statements) prior to accessing the report data. They are called internal reports that are available for storage on a database in XML database.

In reference to claims 3 and 4, Ballantyne teaches generating the report data in response to a user requesting information via email or another retrieval system such as the Internet. The user may request billing statements or invoices. The data presentation language used by Ballantyne is XML. See columns 17-18.

In reference to claim 5, Ballantyne teaches accessing report data for the user wherein the report data can be delivered in XML formatted billing statements or invoices. See column 17.

In reference to claims 6-7, Ballantyne teaches outputting the XML data on a display device. The results data would be outputted to a "space" in a computing environment.

In reference to claim 9, Ballantyne teaches that services such as Electronic Bill Presentment can provide the presentation schema used to generate the XML output. See column 17.

In reference to claim 11, Ballantyne teaches that the output of the XML schema can be an XML document.

In reference to claims 13 and 14, Ballantyne teaches that the results data can be presented in visual format for display on a display device. See columns 17-18.

In reference to claim 15, Ballantyne teaches the use of a presentation schema in the form of XML schema wherein the schema can comprise presentation characteristics of data elements. See columns 6-8. The user may also modify the schema.

In reference to claim 16, Ballantyne teaches accessing a first presentation elements and locating one or more data elements within. Ballantyne's system comprises a hierarchy of the XML schema wherein the depth of the element corresponds to its position in the tree structure. See figure 7 and column 11. The tree structure of the XML schema can be used to access data elements by traversing the tree. See columns 11-12.

In reference to claim 17, Ballantyne teaches accessing the data elements in the tree structure of the schema. See columns 11-12.

In reference to claim 18, Ballantyne's system is a data presentation system.

In reference to claim 19, Ballantyne's system can take place over a network where a client would use one device and the process would occur in another device.

In reference to claims 20-22, Ballantyne's system teaches the client receiving report data from the service and the report data is presented to the client upon his request being received.

In reference to claim 23, Ballantyne teaches that the client receives the presentation schema in the form of an XML output and the schema can be provided by the client by formatting the schema in the model GUI. See columns 6-8.

Claims 24-26, 29, and 31-35 are rejected under the same rationale used in claims 1, 3, 4, 11, 13, 14, 16, 17, and 18 respectively above.

In reference to claim 36, Ballantyne's system can take place over a computer system and network in which one device sends a message to a service device and the service device generates results. See column 17-18.

In reference to claim 37, Ballantyne teaches that the client's device can include a display. See column 17 and 18.

In reference to claim 38, Ballantyne's system teaches the client receiving report data from the service and the report data is presented to the client upon his request being received.

In reference to claim 39, Ballantyne's system teaches the client receiving report data from the service and the report data is presented to the client upon his request being received.

In reference to claim 40, Ballantyne's system teaches the client receiving report data from the service and the report data is presented to the client upon his request being received.

In reference to claim 41, Ballantyne's system teaches the client receiving report data from the service and the report data is presented to the client upon his request being received.

In reference to claim 42, Ballantyne teaches that the presentation schema advertisement can be stored in a storage device on the service device. See columns 17-18.

In reference to claim 43, Ballantyne teaches that the service device can generate report data upon receiving a request for the report data. See columns 17-18.

In reference to claim 44, Ballantyne teaches outputting the XML data on a display device. The results data would be outputted to a "space" in a computing environment.

In reference to claim 45, Ballantyne teaches outputting the XML data on a display device. The results data would be outputted to a "space" in a computing environment.

Claim 46 is rejected under the same rationale used in claim 1 above.

Claim 47 is rejected under the same rationale used in claim 3 above.

Claim 48 is rejected under the same rationale used in claim 1 above.

In reference to claim 49, Ballantyne discloses that the service provides the presentation schema. See columns 6-8 and columns 17-18.

Claims 51 and 53-57 are rejected under the same rationale used in claims 11, 14, 15, 16, 17, and 19 respectively above.

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 8, 10, 27-28, and 50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ballantyne et al., US 6,687,873 B1, 2/3/04 (filed 3/9/00).

In reference to claims 8 and 27, Ballantyne teaches providing results data in the form of XML to a display device. The XML data may comprise invoices, billing statements, or any other type of report data including advertisement. Although Ballantyne does not state "advertisements", the term "report data" could comprise an

advertisement. Moreover, one of ordinary skill in the art would recognize that an XML schema could be used to describe any number of outputs in XML format including invoices and advertisements, thus it would have been obvious to one of ordinary skill in the art at the time of the invention to produce advertisements as “result data” since and XML schema can be used to produce XML formatted data. See column 17.

In reference to claims 10, 28, and 50, Ballantyne teaches storing presentation schema in a storage device. See column 17, lines 15-25. Ballantyne teaches providing results data in the form of XML to a display device. The XML data may comprise invoices, billing statements, or any other type of report data including advertisement. Although Ballantyne does not state “advertisements”, the term “report data” could comprise an advertisement. Moreover, one of ordinary skill in the art would recognize that an XML schema could be used to describe any number of outputs in XML format including invoices and advertisements, thus it would have been obvious to one of ordinary skill in the art at the time of the invention to produce advertisements as “result data” since and XML schema can be used to produce XML formatted data. See column 17.

9. Claims 12, 30, and 52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Claims 8, 10, 27-28, and 50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ballantyne et al., US 6,687,873 B1, 2/3/04 (filed 3/9/00) in view of Sravanapudi et al., US 2001/0049603 A1, 12/6/01 (filed 3/8/01, provisional 3/10/00).

In reference to claims 12, 30, and 52, Ballantyne does not teach the presentation of report data in an audio format; however, Sravanapudi teaches a multimodal

information system in which information can be delivered in a variety of formats including audio. See pages 1-3. It would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate Sravanapudi's audio presentation of result information in the system of Ballantyne since it allows a user to be reached via multiple channels and also allows the user to listen to the data through a sound system. See page 1 of Sravanapudi. Sravanapudi also teaches utilizing Voice XML as a means for rendering the data as audio. It would have been obvious to utilize Voice XML in Ballantyne's XML output presentation as it is a form of the representation language used. See page 5 of Sravanapudi.

### ***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Russell-Falla et al.                      US 6,675,162 B1

Ostroff et al.                              US 2002/0013782 A1

Muyres et al.                              US 2002/0002488 A1
